Coated White Back Duplex Board

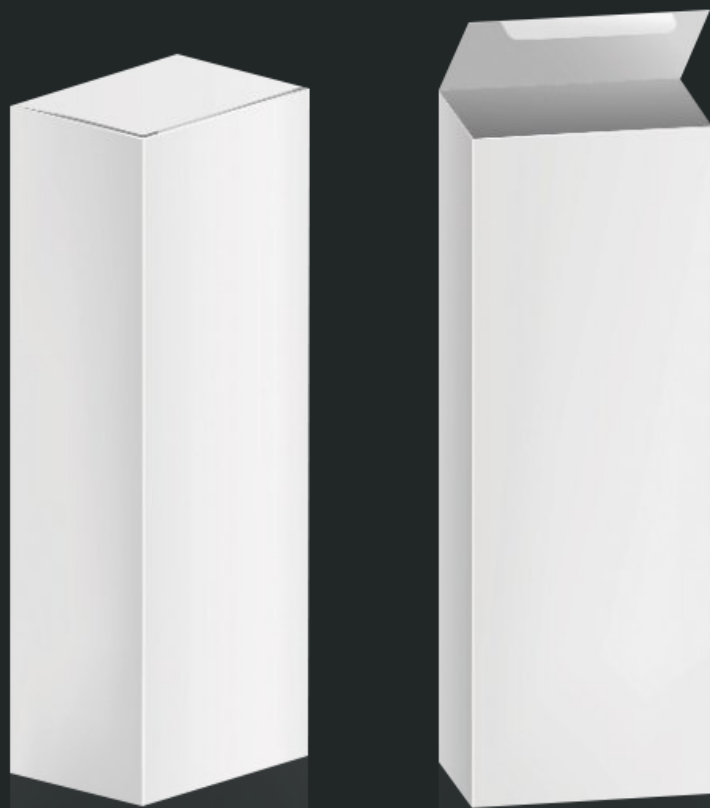

The outer and internal layers of White Back Duplex Boards are both white. Our White Back Duplex Boards have a glossy finish and are coated with bright white pigments, which improves print quality. We use 100% recycled paper pulp for our product, however, the quality is not compromised at any stage. Our duplex paperboards have a unique 8 level composition and a uniform coating is ensured for premium quality and its applications include – pharmaceuticals, apparel, Match Box, Liquid Packaging, Food Packaging, Cards, various other Packaging applications.

Coated Grey Back Duplex Board

White outer and grey internal layers are used to make Coated Grey Back Duplex Board Paper. It has a glossy finish that is enhanced by the use of vivid pulp pigments. This characteristic also allows for higher print quality. Our coated Grey Back Duplex Board has calendared exteriors, resulting in a white, smooth surface suitable for offset printing and a coated grey textured inside. Our product is made entirely of recycled paper pulp, yet the quality is not compromised at any point. Pharmaceutical, Apparels, Match Box, Liquid Packaging, Food Packaging, Cards, & numerous other Packaging applications are among the applications for our duplex paper boards, which feature a unique 8 level composition and a consistent coating for premium quality.
